

SOFTWARE & NETWORK ENGINEER (M/F/D)

YOUR IMPACT

At Inter.link we dream big, take risks, and are challenging global connectivity's sustainability. If you are ready to do the same, you have a great sense of humor and you want to join our striving team send us your application!

YOUR PROFILE

OPERATIONS AND ARCHITECTURAL EXPERTISE

In your role, you will be responsible for ensuring network services are implemented, delivered on time, operated, and supported.

- You will help to incorporate customer requirements into our product development and overall strategy.
- Continuously work towards improving our network.
- Daily tasks will include problem and incident management to ensure that automation workflow is running.
- Managing the deployment and day-to-day operations and implementing proactive monitoring and maintenance procedures to guarantee uninterrupted service is in your DNA.
- Proven ability to develop robust and scalable backend applications in Python, crafting well-structured APIs and integrating with other systems.

PROFESSIONAL EXPERIENCE

- Experience operating global internet service provider networks.
- You have a proven track record in network engineering roles.
- An understanding of network architecture, routing, and switching.
- Experience with continuous integration and deployment (CI/CD) pipelines.
- Familiar with network automation using Ansible and facilitating several APIs.
- Proficiency in scripting or programming languages such as Python or Bash to automate network tasks and workflows; Django experience is a big plus.
- Understanding of version control systems, such as Git, for managing configurations and code.
- Experience in network data and documentation handling using NetBox.

How we create a connection!

- 100% remote work in an environment that works best for you
- Virtual Stock Option Program
- Office Budget - 500 Euros to create your perfect workspace
- Retreats - In-person retreats to connect with your coworkers
- 30 days of paid vacation per calendar year
- Virtual social events

Stefan, our Head of Tech Operations and James, our Tech Lead Product are looking forward to hearing from you!
