

The Hasso Plattner Institute, academically constituted as the Digital Engineering Faculty of the University of Potsdam, in the course of its strong growth, is looking for the next possible date at the Potsdam location for a

Postdoctoral Researcher (m/f/x)

Department: Data Intensive Internet Computing (DIIC)

Within the DIIC department, we apply data-intensive methods, and build real-world systems and models to improve Internet computing and operations. Our research group investigates digital infrastructure, next-generation network protocols and architectures, emerging cyber-physical systems, and aspects of digital sovereignty in the age of increasing consolidation of the Internet.

Your Qualifications

- A doctoral degree in Computer Science, or a related field.
- Strong programming skills, such as in C, Python, Go etc.
- Strong understanding of networking and systems research.
- English proficiency.
- Ability to work independently and demonstration of creativity
- Willingness to support teaching of our bachelors and masters courses.
- Willingness to mentor bachelors, master and doctoral students.
